

FRG KeySafe Management

Versatile and secure on-site key storage and remote access management

FRG KeySafe Management is a **secure and convenient** system to **store keys and remotely control access** of tradespeople, staff, security officers and letting agents to sites, properties and facilities **24/7**. The cloud based system keeps an up-to-date audit trail of all activity, giving you detailed information of **exactly who used the system and when**.

- **Safe, secure and robust**
- Several keys and access cards can be stored inside including mortice lock keys
- Keys secured to a retractable lanyard **ensuring the keys stay with the box**
- **Permanent or temporary access codes** can be issued to approved users with different codes and group codes available depending on user access requirements
- **Access codes generated remotely via our 24/7 management portal** and can be issued to approved users via company administration, or by text and email
- Flexible and traceable one day codes to provide emergency/tradesperson access - **avoids costly missed calls for service or access visits**
- All activity recorded for full audit trail

STREAMLINE ACCESS, INCREASE COMPLIANCE AND PRODUCTIVITY
